Senior Applied Scientist with 10+ years of experience building large-scale machine learning and data infrastructure systems. Currently leading ML initiatives in Amazon Redshift focused on autonomous data warehouse optimization and AI-driven analytics. Previously a tenured computer scientist at Argonne National Laboratory leading $12M+ federally funded research programs in AI for Science and HPC systems. Expertise includes large-scale ML systems, distributed data infrastructure, query optimization, performance modeling, and agentic AI.

Leadership Highlights

- Technical lead for ML systems powering autonomous optimization in Amazon Redshift.
- Principal investigator of 10+ NSF/DOE projects totaling $12M+ funding.
- Led interdisciplinary teams spanning ML, HPC, and large-scale data infrastructure.

Technical Skills

Machine Learning systems, Predictive Modeling, Agentic AI; distributed data systems, HPC; Python, C++, SQL, CUDA.

Professional Experience

Amazon Web Services (AWS), AI Labs **Aug. 2022 — present**
Senior Applied Scientist

- Technical lead for machine learning systems powering autonomous optimization in Amazon Redshift (AWS data warehouse platform), enabling automated scaling, scheduling, and query optimization across large-scale production workloads.
- Developed ML models supporting **billions of optimization decisions per day** for resource management and performance optimization in cloud data warehouse infrastructure.
- Lead scientist developing **agentic AI systems for automatic analytical SQL generation**, enabling natural-language-driven analytics workflows for Amazon Ads.

Argonne National Laboratory **Aug. 2016 — Aug. 2024**
Postdoctoral(2016/08), Assistant Computer Scientist (2019/08), Tenured Computer Scientist (2022/05), Sabbatical leave (2022/08)

- Principal Investigator or co-PI on 10+ NSF/DOE funded projects totaling $12M+, focused on AI-for-Science and High-Performance Computing systems.
- Led research group developing **AI and HPC systems for scientific computing workloads** on leadership-class supercomputers.
- Lead Author of **50+** peer-reviewed papers (5 **best paper awards**) in data infrastructure, distributed systems, and ML systems.
- Developed data and ML infrastructure for large-scale scientific data processing; project won the Technology Challenge at ACM/IEEE Supercomputing (SC'19).

University of Chicago **Mar. 2018 — Aug. 2019**
Research Scientist

- Led research on architecture of autonomous scientific systems combining large-scale data infrastructure and machine learning.
- Developed performance modeling and system characterization techniques for scientific applications on supercomputers.

Embedded Systems Consulting (Founder) **Sep. 2010 — Nov. 2013**

- Founded and operated embedded systems consulting business delivering 10+ engineering contracts.
- Developed board support packages for µC/OS-II real-time operating system.
- Designed and developed streaming systems for vehicle event data recorder devices (connected IoT).

Education

- **PhD., Computer Science**, Autonomous University of Barcelona, Spain Jul. 2016
  - `With Honors(Cum Laude); Extraordinary Doctorate Award(top thesis distinction).`
- **MSc., Guidance, Navigation and Control**, Northwestern Polytechnical University, China Apr. 2013
- **BSc., Aircraft Manufacturing Engineering**, Northwestern Polytechnical University, China Jun. 2010
  - `National Scholarship` (top 0.2%) ×2, 2008 and 2009.
